

# SDK Obsolete Notice

**DATE**

September 30, 2021

Dear valued clients and partners,

We recently discovered a reverse compatibility issue with CLO API/SDK v3.1.3. The problem has now been fixed, and CLO API/SDK v3.1.3 will be obsoleted.

If you have built anything using CLO API/SDK v3.1.3, please re-build with our next update - CLO API/SDK v3.1.4 - which will be released on Oct. 1, 2021.

The reverse compatibility issue also affects the CLO version; therefore, we ask that you use CLO ver 6.1.346 until the new version is released.

The API reverse compatibility issue affects CLO ver 6.1.394.

We sincerely apologize for any inconvenience caused by this issue.
